

Notes -

Max door size = 1m wide x 2.4m High  
 Max door weight = 90Kg  
 For internal doors only.

Maximum pipe run from compressor / control position to doors = 30m.

Note - multiple door operators can run from single air compressor, which must be sized appropriately. Operators can be grouped together with shared control panels, this can generate significant cost savings. Contact WDC for advice / quotation.

For doors outside of these parameters contact WDC technical for assistance.

Door stop required at head of door. Auxiliary stop required if door can be opened beyond 90 degrees.
